Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Osepchuk(U.S.Pat.4,421,968) in view of Jun(U.S.Pat.5,919,391) and Boulard(U.S.Pat.4,751,357). Osepchuk disclose a microwave oven as claimed with a magnetron, a cavity, a stirrer, screws a waveguide, and elevated portions. but does not explicitly show a discloses a concave portion or a screw covering. Jun discloses a microwave oven as claimed comprising a magnetron, a wave-guide and a cooking cavity, characterized in that second and third side walls have at least one concave portion for distributing microwave energy, and also shows the oven uniformly penetrates microwave energy into foodstuffs in vertical and horizontal directions, thereby effectively heating the foodstuffs.

Claims 15, 16, 18 and 20 relate to a microwave oven comprising a cooking cavity, a wave-guide, a stirrer fan and a plate having forming parts, characterized in that the oven uniformly and rapidly penetrates microwave into foodstuffs, thereby efficiently heating the foodstuffs. It would have been obvious to one of ordinary skill in the art at the time of the claimed invention to use the concave portion as taught by Jun with the device of

Osepchuk so as to effectively distribute the microwave energy. Bouland discloses a microwave oven with moving equipment and an accessory for the oven that shows a screw with a cover figure 1. It would have been obvious to one of ordinary skill in the art at the time of the claimed to use a covered screw as taught by Boulard with the device of Osepchuk so as to fasten a shaft of the screw.
